

Christmas 2009

Archie learnt to walk for the first time in Sydney, Australia, when he was 13 months old. Then when he was 18 months old meningitis took his legs.

So for Christmas 2009 we took him back to Australia to meet his cousins in Brisbane and Perth. He had a wonderful time, enjoying the sun, sand and sea. Archie really enjoyed flying; every time we took off he would shout "Wow, I want to do that again!"

The pictures will tell the story. Thank you for your support -please keep raising awareness of meningitis.
